

Our Business Is Keeping You in Business

September 28, 2013

To Whom It May Concern,

It has been my immense pleasure since 2010 to partner with Haugh Construction, Inc. dba Benchmark Construction be our contractor of choice. The Benchmark Construction staff is of the highest quality; they have shown reliability and professional craftsmanship, which has allowed us to expand our business and facilities to meet our growing customer demands.

Tom Haugh is a man of great integrity. He and his staff are extremely dedicated to make sure that all aspects of the project meet the requirements and needs to best satisfy their clients. Their unwavering attention to details, project coordination and efficiency in completing the project helped to keep our business running smoothly throughout their many construction projects at Dover Hydraulics Inc.

At all times I have found them to be dependable, reliable, hard-working, conscientious, honest and courteous throughout the duration of any project that was placed before them.

Benchmark Construction's focus on integrity and craftsmanship is highlighted in their strong commitment to standing behind their work. An example of this can be shown in a minor problem with a door threshold that leaked. After hearing of this problem nearly a year later, Tom worked together with us to remedy the problem in a timely and professional manner. At no time did Tom or his staff question their responsibility for the problem, they simply honored their craftsmanship warranty on the work and made the necessary repairs.

I would not hesitate to contract Benchmark Construction for any future projects in expanding our business. Tom's ability to work within any budget put forth by our planning staff makes him a consistent choice to achieve great results and deliver on all expectations.

Sincerely

Robert D. Sensel

President
